

Matt Aguiluz

Full Stack Software Engineer | Elixir • Phoenix • React • AI-Assisted Development

aguiluz.matt@gmail.com | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

Software Engineer with 3+ years of experience designing, building, and deploying full-stack applications in logistics, warehouse management, and e-commerce environments.

Experienced in translating business requirements into scalable technical solutions, collaborating across cross-functional teams, and delivering features throughout the software development lifecycle using Elixir, Phoenix, React, GraphQL, PostgreSQL, Kubernetes, and AWS.

Leverage AI-assisted development workflows to accelerate technical planning, implementation, testing, and deployment while maintaining a focus on reliability, maintainability, and business impact.

TECHNICAL SKILLS

- **Languages:** Elixir, JavaScript/TypeScript, Python, SQL, GraphQL
- **Frameworks & Libraries:** Phoenix, LiveView, React, React Native/Expo, Node.js, Express, Flask
- **Databases:** PostgreSQL, MongoDB
- **Cloud & Infrastructure:** AWS, Kubernetes, Heroku
- **Development Tools:** Git, GitHub, Cursor, Augment, Figma, Miro

RELEVANT EXPERIENCE

Fullstack Software Engineer | Fillogic | Remote | 09/2022 - current

- Architected and delivered a reverse-logistics apparel grading platform that enables retailers to evaluate returned merchandise, capture condition evidence through photos and annotations, and automate partial-refund decisions based on item quality.
- Designed and implemented end-to-end workflows supporting product returns, resale, recycling, and inventory dispositioning, helping retailers recover value from returned inventory while reducing operational costs.
- Build and maintain full-stack applications across backend services, APIs, databases, and mobile user interfaces using Elixir, Phoenix, LiveView, PostgreSQL, GraphQL, and React Native/Expo.
- Collaborate with product managers, operations teams, and stakeholders to translate complex business requirements into scalable software solutions used by approximately 1,000 users across five warehouse operations.
- Leverage AI-assisted and agentic development workflows to accelerate requirements analysis, technical planning, implementation, testing, and documentation while maintaining high standards for code quality, reliability, and maintainability.
- Contribute to a logistics platform that helps retailers achieve up to 50% faster inventory turns, return up to 95% of returned merchandise to first-quality stock, and reduce logistics costs by 30–50%.

Tech Stack: Elixir, Phoenix, LiveView, PostgreSQL, GraphQL, React Native/Expo, TypeScript, Kubernetes, AWS

Software Engineer Apprentice | Revelry | Remote | 05/2022 - 08/2022

- Completed an intensive apprenticeship focused on Elixir, Phoenix, LiveView, and modern web application development.
- Successfully extended client placement with Fillogic into a full-time Software Engineer position.

Tech Stack: Elixir, Phoenix, LiveView, PostgreSQL, React Native

Software Engineering Fellow | General Assembly | Remote | 06/2021 - 12/2021

- Completed 500+ hours of immersive software engineering training focused on full-stack web application development, software design principles, and agile methodologies.

Tech Stack: JavaScript, Python, React, Node.js, Express, Flask, MongoDB, PostgreSQL

Lead Recording Engineer/Production Manager | Preservation Hall | New Orleans, LA | 05/2014 - 05/2022

- Designed and implemented complex audio infrastructure, including a custom 768-point patching system and integration of analog and digital production environments.
- Managed high-stakes live productions and recording projects requiring real-time troubleshooting, system reliability, and execution under strict deadlines.
- Led technical operations for live-streaming, studio recording, and touring productions while coordinating with artists, engineers, venue staff, and production teams.
- Served as Production Manager and Front-of-House Engineer on national and international tours, overseeing technical logistics and live event execution in venues ranging from clubs to major arenas.

EDUCATION

-
- **General Assembly** | Software Engineering Flex Immersive | Remote | 06/2021– 12/2021
 - **Loyola University** | B.S. Music Industry Studies | New Orleans, LA | 08/2001 – 05/2005
 - **New Orleans Center for the Creative Arts** | Jazz Studies: Trumpet | New Orleans, LA | 08/2000 – 05/2001

ADDITIONAL LIFE EXPERIENCE

-
- Extensive travel throughout Europe and Asia
 - B2 Conversational Spanish
 - International professional experience living and working in Japan, the United Kingdom, and Spain
